Trading Rules & Guidelines :

1	We exclusively use pending orders (Limit/Stop); no instant executions are performed to ensure precision.
2	Every transaction utilizes a fixed risk-per-trade model rather than a fixed lot size, as our backtest data confirms this is optimal for long-term capital growth.
3	The performance data shown above is calculated based on monthly trade results without compounding.
4	We provide signals with a single entry price (not a zone), one Stop Loss, and one Take Profit level. We do not use tiered Take Profits (TP1, TP2, etc.).
5	Once a trade is active, there are no Stop Loss adjustments, no Break-Even (BEP) settings, no partial closes, and absolutely no manual intervention.
